

Catholic Health Exceeds \$9M in Savings with Service Maintenance Program

Catholic Health

Catholic Health is an integrated system encompassing some of the region's finest health and human services agencies. The health system has nearly 17,000 employees, six acute care hospitals, three nursing homes, a home health service, hospice and a network of physician practices.

Results

\$9 million dollars saved since inception of program
53,000 service events managed successfully

Challenge

Catholic Health was experiencing the impact of decreased operating budgets, increased costs, and lowered federal reimbursements. As a leading healthcare provider with consistent growth forecasted and treating hundreds of thousands of patients each year, it was imperative that they find ways to save money. For them, a service maintenance program was a step in the right direction.

Solution

Through partnering with PartsSource and developing a consolidated maintenance and repair agreement approach, Catholic Health has established a program that today covers nearly 2,000 items including, but not limited to, MRI Scanners, X-Ray Units, and Ultrasounds

In the first year of the partnership, this healthcare system was able to deliver over \$1 million in savings. The partnership continues to grow and they've enjoyed more than \$9 million in savings compared to other vendor contracts. Given their challenges of shrinking budgets due to increased costs and lowered federal reimbursements, the true success was in finding significant savings, reducing administrative burden, and improving reporting.
